DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Applicant's response filed 02/10/06 in reply to the Office action of 10/21/05 has been entered. Claims 23-27, 30, and 41 have been amended. Claims 23-42 are pending.

This Office action contains NEW GROUNDS OF REJECTIONS and is made non-final. Any inconvenience the delay may have caused Applicant is deeply regretted.

Claims 23-42 are pending and are examined.

All previous objections and rejections not set forth below have been withdrawn in view of Applicant's amendment and/or upon further consideration.

Priority

Applicant's claim for the benefit of the prior-filed application 09/504, 487 under 35 U.S.C. 120, as a continuation is acknowledged. However, this application adds and claims additional disclosure not presented in the prior application. For example, claims 23-26 recites sequences comprising regulatory regions (1 to 1311; 1155 to 1311; 1179 to 1208; and 1239 to 1278) of SEQ ID NO: 1 and 2 that are not present in the prior art application. Therefore, this application would constitute a CIP (continuation-in-part) of application 09/504, 487.

Claim Rejections - 35 USC § 102

Claims 32, 38-39 and 41-42 are rejected under 35 U.S.C. 102(b) as being

Art Unit: 1638

anticipated by Cigan et al (US 5, 795, 753). This rejection is repeated for the reasons of record as set forth in the last Office action of 10/21/05. Applicant's arguments filed 01/03/06 have been considered but are not deemed persuasive.

Applicant argues that the claimed fragment of SEQ ID NO: 1 or 2 essential for regulatory activity is not anticipated by the anther-specific promoter taught by Cigan et al. Applicant asserts that the claimed fragment retains the function of SEQ ID NO: 1 or 2. Applicant, therefore, requests that the rejection be withdrawn.

These are not persuasive because the maize anther-specific promoter disclosed by Cigan et al inherently possesses regions essential for male-tissue regulatory activity; therefore, it would anticipate the claimed fragment of SEQ ID NO: 1 or 2 essential for regulatory activity. Applicant has provided no clear and convincing evidence showing how the claimed fragment distinguishes from the prior art promoter. Therefore, the rejection is proper.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 1638

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 23-42 are rejected on the ground of nonstatutory double patenting over claims 1-30 of U. S. Patent No. US 6, 037, 523 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: isolated male tissue-specific regulatory sequences comprising SEQ ID NO: 1 or 2 or a fragment thereof essential for regulatory activity, method of expressing exogenous nucleotide sequence encoding a protein that disrupts male tissue function using said isolated regulatory regions, and transgenic plant and plant cells comprising said male tissue regulatory sequences.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Remarks

No claim is allowed.
